

Motion Picture and Television Production Crafts Program Information

The **Motion Picture and Television Production Crafts Program**, administered in conjunction with Hollywood CPR and West LA College, is a one-of-a-kind, multi-tiered motion picture, television and stagecraft production education training program that covers the entire spectrum of the entertainment industry's career pathways, including crafts often absent from formal learning environments, such as **stagecraft, grip, set lighting, costuming, set painting and set decorating, as well as more traditional disciplines such as camera, sound and editing.** Via face to face and online instruction, students learn these specialized skills from highly experienced industry professionals who are masters in their trade. Foundational classes focus on the most important and common skills expected of an entry-level worker. The program includes comprehensive life skills coaching and support to promote success in obtaining and maintaining employment along any career pathway. Classes function like a real-world production to prepare students for the working conditions they will experience on a film, stage or television show.

The program begins with **Introduction to Motion Picture and Television Crafts** and is a required class if you are interested in taking any of the specialized craft classes. **This class will be offered on Mondays and Wednesdays beginning Monday, August 30, 2010 and ending Wednesday, October 23, 2010 (1:00pm-4:20pm) in ATA 128.**

Upon successful completion of the prerequisite FLM PRD 100 (Grade C or better), you can then select the one of the craft classes offered the following session. You may take as many of the craft classes you like, however if you are interested in pursuing a career in the crafts, you would need to determine which craft to specialize in and pursue that pathway. During the final week of your introduction class we will be meeting with you to help you determine your career goals.
